

SAVE YOUR ENERGY

Because our Prescriptive
and Custom Programs are
here for your business.

Elizabethtown Gas (ETG) offers programs that provide financial incentives for businesses to purchase and install high-efficiency natural gas equipment. By using less energy, high-efficiency equipment can help lower operating costs.

Prescriptive Program

Financial incentives are available when you upgrade your business's natural gas equipment and services, including:

- Boilers and furnaces
- Natural gas cooling
- Commercial kitchen equipment
- Controls
- Ventilation
- Appliances
- Steam trap repairs

A complete list of equipment can be found at [Business.ETGEnergySavings.com](https://www.business.ETGEnergySavings.com).

Custom Program

Designed for more complex and unique pieces of equipment not covered under the Prescriptive Program, the Custom Program provides flexible financial incentives tailored to your business energy needs. By leveraging this program, you can potentially lower monthly energy expenses and shorten the payback period for your new equipment. Financial incentives for custom projects have increased too – now up to \$3.75 per therm saved.
