

SAVE YOUR ENERGY

Because Strategic Energy Management (SEM) ensures ongoing energy savings.

Program Overview

Saving energy doesn't have to be complicated. With Elizabethtown Gas' (ETG) SEM offering, your business can reduce its energy use without expensive infrastructure upgrades. SEM is a proven approach that can help lower operating costs and boost your bottom line. By focusing on smarter energy use and continual improvements, SEM can drive long-term savings for your business.

Our team is here to support you through the entire process, offering expert guidance and resources at every stage.

How It Works

Start by requesting an audit, which includes modeling and opportunity register, to explore opportunities for energy and cost savings based on your business needs. ETG will pay 70% of the audit cost, up to \$10,000. The co-pay for the remainder will depend on your annual natural gas usage.

Empower your energy team. Your internal team will learn about energy efficiency and pave the way for savings.

Set realistic goals. Put together an attainable action plan, including the implementation of low- or no-cost upgrades, and we'll help you achieve it. We provide ongoing guidance and support, measure your progress, and make any necessary adjustments.

Our Process

1. **Modeling** – Our team gathers data and performs a historical analysis to model your facility's energy usage.
2. **Opportunity Register** – We present you with a summary of our findings, which include low- or no-cost and capital measures.
3. **Assessment** – You review the opportunity register and determine which measures you may want to implement. An in-depth assessment can be performed for any energy-saving measure.
4. **Verification and Measurement** – After implementation, we verify savings of the low- or no-cost measures you have selected to determine your final incentive amount.

Benefits of SEM

- 1
Reduce energy costs
- 2
Improve building comfort
- 3
Fix maintenance issues
- 4
Increase operations sustainability
- 5
Foster employee energy awareness

Discover the Full Scope of the South Jersey Gas Energy Management Program

Save your energy and get incentives. Watch your energy usage decrease and see your operating costs go down. Plus, receive \$0.50 for each therm saved and \$0.04 for each kWh saved – with no cost cap!

Eligibility

Your facility should be 50,000 square feet or larger with a recommended annual natural gas usage of 100,000 therms or more. In addition, historical gas and electricity utility usage data (such as interval meter readings or daily usage, if available) are required. Production data may also be requested (if applicable).

SEM Payment Structure	Small (100,000–400,000) therm annual usage	Medium (400,000–1,000,000 therm annual usage)	Large (> 1,000,000 therm annual usage)
Total Cost for Audit (includes modeling and opportunity register)*	\$14,000	\$18,000	\$21,600
Utility Audit Contribution	\$9,800	\$10,000	\$10,000
Customer Co-Pay for Audit	\$4,200	\$8,000	\$11,600
Customer Co-Pay for Focused Assessment (optional)	\$2,100	\$2,550	\$3,000
Incentive Payment to Customer for Low-/No-Cost SEM Measures	\$0.50/therm saved \$0.04/kWh saved		

*Utility co-pay covers 70% of the audit cost, up to \$10,000.
