

SAVE YOUR ENERGY

With incentives on regular boiler and furnace tune-ups.

Boiler and Furnace Tune-Up Incentives

When it comes to your heating system, preventive maintenance can go a long way. Tune-ups help boost the performance of your furnace or boiler, reduce fuel consumption, and prevent breakdowns. It's especially valuable for existing equipment that may be operating below optimal efficiency due to age, condition, or improper calibration.

Elizabethtown Gas (ETG) helps reduce the cost of tune-ups for natural gas heating systems of all sizes, including condensing and non-condensing hot water or steam boilers, as well as natural gas furnaces.

Available Incentives

Equipment Type	Incentive
Boiler Tune-Up	\$1.00 per MBH
Furnace Tune-Up	\$250 per unit

Eligibility Requirements

- The tune-up must be performed on existing equipment only.
- Equipment is eligible every three years.
- The incentive cannot exceed tune-up cost.
- For boilers, pre- and post-combustion analysis results at low, medium, and high fire that show performance gains must be submitted with the application.

Tune-Up Benefits

Improved system reliability

Enhanced fuel efficiency

Lower energy costs

Extended equipment life

Enhanced safety
